

2026 Enterprise Analytics Report

Prepared for Executive Leadership Team

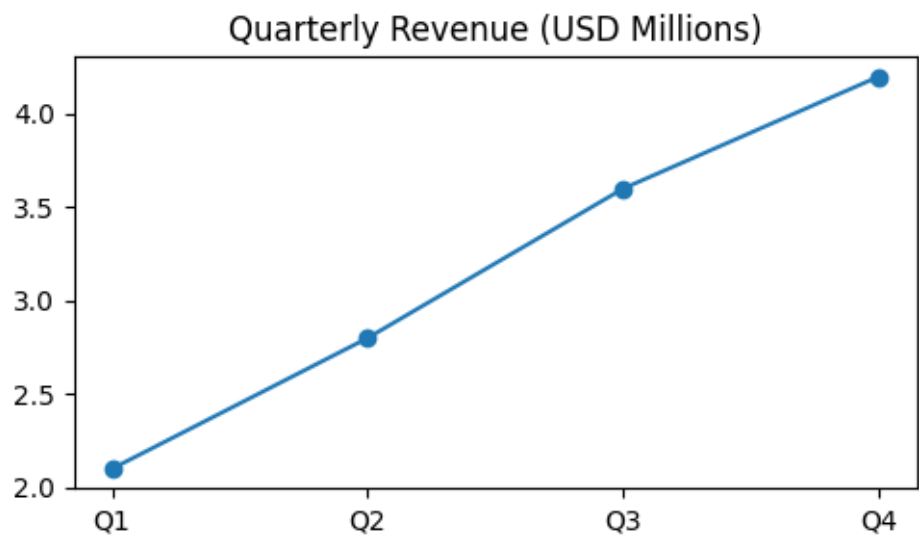

Executive Summary

This report summarizes business performance, customer growth, product adoption, and operational metrics for FY2026. The document intentionally combines text, charts, images, and tables to simulate a realistic enterprise PDF suitable for testing multimodal RAG systems.

Key Highlights

- Revenue increased by 32% year-over-year.
- Customer retention reached 94%.
- Enterprise customers contributed 55% of revenue.
- AI-powered features generated the highest engagement.

Business Performance

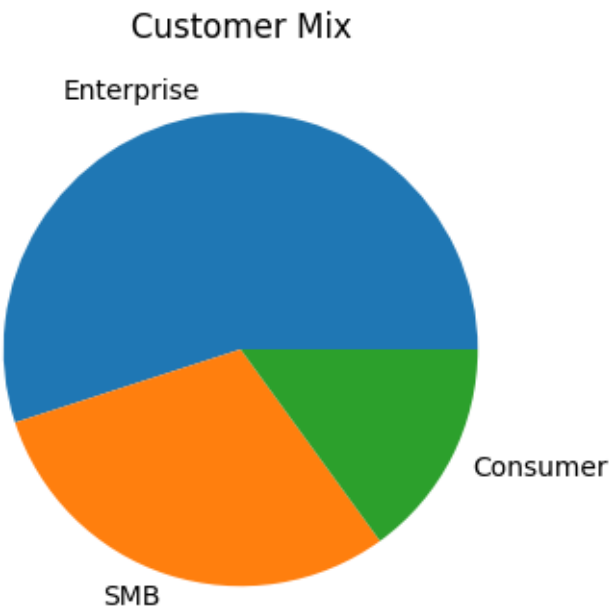

Revenue growth accelerated during the second half of the year due to increased enterprise adoption and international expansion.

Metric	2025	2026	Growth
Revenue (\$M)	9.2	12.1	31.5%
Customers	8,400	11,500	36.9%
Retention	91%	94%	3.3%
NPS	48	61	27.1%

Product Adoption

Analytics Dashboard Screenshot

The figure above represents a typical analytics dashboard used by customers. Visual content like screenshots is common in enterprise documentation.

Customer distribution demonstrates that enterprise accounts remain the primary revenue driver.

Conclusion

This sample document contains realistic enterprise elements including narrative text, tables, charts, images, headings, and multiple pages. It is suitable for evaluating PDF parsing, multimodal retrieval, vision-language models, and enterprise RAG pipelines.
